Individual Abutments in Titanium | CoCr (NP)

Wieland Zenotec Ti | NP

Design your individual abutments according to your preferences, ideas and requirements. Due to the abutment library which we provide free of charge, you are the designer and are able to send us files which we will produce in the accustomed quality and shortest delivery times.

Preconditions:

- Original model analog
- CADdent library (will be provided by us for free)
- 3Shape Software (from version 2015 onwards), exocad and Dental Wings
- CADdent scan bodies and screw drivers
- Abutment designer

"Standard" Abutments in Titanium | CoCr (NP)

Wieland Zenotec Ti | NP

Individually milled for you.

Production Time

When ordering until 2 pm by telephone, for ≤ 2 abutments, delivery will be effected on the next working day and ≥ 3 abutments on the 3rd working day.

Provisional Abutments made of LaserMelting Titanium | CoCr (NP)

rematitan® | remaniumstar®

Individually lasered for you.

Production Time

When ordering until 4 pm by telephone, delivery will be effected on the same working day, if available.

Terms of Payment

Term of credit: 10 days net

Grant us a direct debit authorization and you will receive 2% cash discount on the invoice amount. Debiting will be effected every 10th of the following month.

When achieving 4.000,00 € monthly net sales, we grant you a quantity discount of 5%. Vouchers and LaserMelting flat rate excluded.

International Delivery Costs

Delivery foreign countries (= EU countries)

UPS Express Saver - Delivery on the following working day. (except periferical areas)
Working Days (Mon.-Fri.)

5.95 €

Standby

Time saves money

Standby means, you benefit from an unbeatably favourable price and give us one additional day production time.

Goodwill insurance

Dental fully comprehensive insurance

Our "comprehensive care-free package" for you. Insure your orders against impression errors or damages. We produce your concerned order NEWLY free of charge in the event of damage.

The goodwill insurance takes effect in the following cases: Impression errors of your dentist, construction mistakes, wrong colour selection, inadvertent damaging in your lab etc. Preconditions: The insurance does not apply for repeated works. Construction is within the indication, goodwill notification within one year or splints within one month respectively and that you send the affected work back to us. Excluded are delivery errors caused by UPS.

Additional weight

LaserMelting Single coping | crown | bridge up to 14 units

For extra weight exceeding 2g (>230 mm³), we charge a material surcharge for every further gram (>115 mm³).

LaserMelting partial frameworks

For extra weight exceeding 20g (>2300 mm³), we charge a material surcharge for every further gram (>115 mm³).

Repair of data files

LaserMelting CoCr (NP) | Titanium

On request, e.g. LaserMelting structure is not connected.

Express Service

Milling Technology CoCr (NP) | Titanium | Zirconia | Plastics

For urgent orders, which arrive AFTER the deadline and shall be produced the same day.

ONLY after telephonic agreement.

LaserMelting partial frameworks

Urgent orders which have been sent within the deadline and shall be despatched on the NEXT working day.

Individual special colouring

Prettau® Zirconia | Prettau® Anterior®

Standard shade (tooth neck/ dentine / cutting edge).

Material is coloured individually by us before sintering (The colour penetrates the structure).

This price includes a standard shade. On request, an individual special colouring is available for a surcharge.
